Investment Objective

The Fund's objective is to provide its shareholders with risk-adjusted returns which exceed the MSCI Europe (US\$) index. It invests principally in UK and European operating companies, family-controlled investment holding companies, closed-end funds and investment trusts. It seeks investments with strong balance sheets that sell at attractive P/E ratios or large discounts to NAV, with the potential to grow earnings per share or NAV significantly over the long term. The benchmark figures used for comparison do not include dividends. We estimate that if dividends, net of withholding taxes, are included in the benchmark returns, the benchmark returns would increase by nearly 2.5 percentage points. The performance of the Fund does not include fees charged in clients' segregated accounts, which are the higher of 1% of assets or 10% of any gains above the high-water mark.
